## REPORT OF SCHOOL BOARD.

---

The number of school children as returned by the enumerator, Oct. 1, 1904, was 77.

The number of scholars attending school as shown	
by the registers, boys, 30, girls, 50,	80
Under six years of age,	6
Between six and sixteen,	71
Over sixteen,	3

The per cent of attendance for the year was 91.

Three schools were maintained during the spring and fall, but in the winter they were consolidated into two.

The same teachers as last year have been employed in the village, and their work has been characterized by the same painstaking and thoroughness as heretofore.

At the West school Miss Anna Britton taught the spring and fall terms. Miss Britton had a very pleasant way of managing her school and did very good work.

The study of vocal music was introduced into our schools last spring, for which we were obliged to employ a special teacher. Two lessons a week were given in each school during the spring term, and the same number was continued in the primary room during the year, while only one lesson a week was given in the other schools. The results have been gratifying.

It is a pleasure to see the schoolroom filled with visitors on examination day, and it would encourage both teacher and pupils to have the parents and friends visit the schools oftener during the term, and thus see the every day work of the school. It is generally the case that those

who are most familiar with the work that is going on in our schools are the ones who see the most to commend.

The repairs that have been made upon the heating apparatus in the village schoolhouse, together with the double windows, have resulted in making the schoolroom very comfortable during the severe winter weather. No complaint whatever has been made about the temperature of the rooms this winter.

## ROLL OF PERFECT ATTENDANCE.

## REPORT OF FIREWARDS.

---

The cisterns for water supply have been kept supplied with water during the year.

Owing to the scarcity of water the well supplying the reservoir in the center of the town was not cleaned in the fall, but we succeeded in keeping the water running until Jan. 1.

The engine is in working order.

There is probably not more than 300 or 400 feet of hose which is safe to use. Quite a lot of hose is practically useless for fire protection.

The \$25.00 appropriated for water supply has not been used, as conditions made it, in our judgment, impracticable to expend it.

Respectfully submitted,

A. D. WRIGHT,  
Chief of Firewards.
